

***Note from the Editor**

I wish to advise readers that the article entitled: *The integration of BIM in education: a literature review and comparative context*, co-authored by Violeta Nushi and Arta Basha-Jakupi, from the University of Pristina Hasan Prishtina, Pristina, Kosovo, published in the Global Journal of Engineering Education (GJEE), Vol.19, No.3, 273-278 (2017), was retracted on 6 November 2022 due to some omissions and inaccuracies identified by the authors.

6 November 2022

Please note that the authors have contacted me recently with their request to have a corrected version of the article published in the GJEE. The article has been corrected by the addition of missing references and italicising direct quotations. The core content of the article has not been changed, and the overarching aim is to set the scientific record straight.
