

## Guest Editorial

The 6th Mediterranean Seminar on Engineering and Technology Education took place at the newly-formed University of West Attica (UNIWA), Greece, in September 2018. Many academics from all over the world participated in the Seminar with informative and high-quality presentations. Considering the setting of the Seminar, worth noting is a presentation delivered by Dr Eleni Korika, General Director of Antiquities and Cultural Heritage at the Ministry of Culture and Sports in the Hellenic Republic, entitled *Ancient paint and its techniques in Tenea, Korinthia*, in an ancient Greek city close to Korinthos.

Most of the papers presented at the Seminar have been included in the current issue of the World Transactions on Engineering and Technology Education (WTE&TE).

During the Seminar, a workshop entitled *Publishing in WIETE Journals - How to become a Published and Cited Author, Part 1 - How to write a Journal Article* and *Part 2 - How to write - Mechanism of Citation Impact*, was very well received. The workshop was prepared and presented by Mrs Dorota I. Pudlowski, WIETE Managing Director and Prof. Zenon J. Pudlowski, WIETE Director, Melbourne, Australia.

At the end of the Seminar, an interesting and useful discussion took place, during which the participants expressed their desire to continue the Mediterranean Region Seminar on Engineering and Technology Education, and to have the 7th Seminar organised again at the UNIWA in September 2019.

I would like to express my gratitude to the many colleagues who offered their support in organising this Seminar.
