Education

Editor-in-Chief: Zenon J. Pudlowski
UNESCO International Centre for Engineering Education (UICEE)
Monash University, Melbourne 3800, Australia

UICEE Partners

AGH University of Science and
Technology, Kraków, Poland

Anna University
Chennai, India

Caledonian College of Engineering
Muscat, Oman

East China University of Science &
Technology, Shanghai, PRC

Gdynia Maritime University
Gdynia, Poland

Higher Institute of Engineering
Hoon, Libya

Hochschule Wismar – University of
Technology, Business & Design
Wismar, Germany

Liverpool John Moores University
Liverpool, England, UK

Lucian Blaga University of Sibiu
Sibiu, Romania

National Changhua University of
Education, Changhua, Taiwan

Polytechnic University
New York, USA

Silesian University of Technology
Gliwice, Poland

Tomsk Polytechnic University
Tomsk, Russia

University of Science & Technology
Houari Boumediene
Algiers, Algeria

Vilnius Gediminas Technical
University, Vilnius, Lithuania

Papers published in the World Transactions have undergone a formal process of peer review by international referees.

This Journal is copyright. Apart from any fair dealing for the purpose of private study, research, criticism or review as permitted under the Copyright Act, no part may be reproduced by any process without the written permission of the publisher.

Responsibility for the contents of these articles rests upon the authors and not the publisher. Data presented and conclusions developed by the authors are for information only and are not intended for use without independent substantiating investigations on the part of the potential user.

Contents

Z.J. Pudlowski	Editorial	207
R.B. Ward	Educating – crisis	209
L.G. Boussiakou & E.C. Kalkani	The needs in continuing education courses for professional engineers	215
G. Davis & M. Wanous	Assessing Education for Sustainable Development (ESD) within engineering	223
R. Devon, G. Okudan, H. Nguyen, A. Gordon, S. Bilén, X. Wu & D. Sathianathan	Decision-making models for choosing CAD software	227
B. Moulton, D. Thompson & P. O’Loughlin	A multidisciplinary education framework that enables people from different disciplines to work together with community-based organisations on real-world projects	235
E.A. Danilova & Z.J. Pudlowski	Engineering education reform: the imperatives for ensuring its quality and outcomes	239
M. Isreb & B. Stark	Monash University’s Gippsland Campus’ innovative <i>going green</i> -based system for infrastructures education with environmental cultural change applications	245
M. Alias & H.H.M. Saleh	The effect of the blended Problem-Based Learning method on the acquisition of content-specific knowledge in mechanical engineering	249
D.R. Muñoz & C.K. Skokan	Humanitarian engineering programme: conceptual challenges	253
J. Uziak & M. Luyckx	Project-Based Learning – analysis and synthesis of mechanisms for awning window linkages	257
J. Njock Libii	Applying the dynamics of the pendulum to the design of a playground swing	263
J.S. Tate & V. Sriraman	Developing the research aptitude in senior year manufacturing engineering students	267
S. Thatcher	Experiential learning and the classification of team skills in pilot education	271
C. Scarlet	Developing new curricula for engineers’ entrepreneurial education: a Romanian experience	275
I. Iskhakov, Y. Ribakov & N. Davidovich	Incorporating a shaking table into a basic course in earthquake-oriented structural engineering	279
H-C. Liao & Y-h. Wang	The incorporation of the AECE 4-D cycle learning system into technological and engineering education	283
M.S. Takriff, S.R.S. Abdullah, N.H. Tan Kofli & D. Nordin	Integrated delivery in chemical engineering education	287
S.I. Hadjileontiadou	Supporting collaborative learning interactions: an activity theory-based approach	291
Y.K. Hoh & K.A. Toh	Using the biographies of outstanding women in electrical and electronics engineering to overcome teachers’ misperceptions of engineers and engineering	295
C-M. Chou, C-H. Shen & Y-J. Lee	A study of enterprises’ employment terms and competences for technological and vocational school graduates in Taiwan	301
W-J. Shyr	The application of the case teaching method to a mechatronics course	309
A. Shanableh & M. Omar	Shaping engineering education in the Middle East – a report on four engineering education conferences held at the University of Sharjah	313
M. Minadeo-Cook & M. Court	Identifying an educational void and new teaching approach for input modelling	319

T-C. Wu, Y-H. Shu & S-Y. Shiau	Developing a Safety Performance Scale (SPS) in departments of electrical and electronic engineering at universities: an exploratory factor analysis	323
C-Y. Chao, Y-L. Huang & P-C. Wang	A study of the teacher quality index of professional teachers at vocational industrial high schools in Taiwan	327
L-S. Lee, L-T. Chang & K-Y. Lin	Critical issues and their solutions in the international accreditation of engineering and technology programmes in Taiwan	331
T.D. Ropp, S. Dubikovsky & R. Sterkenburg	Using collaborative learning projects to blend teamwork and technical competences in an aviation technology curriculum	337
G. Xiong & X. Lu	A CDIO curriculum development in a civil engineering programme	341
G.N. Nikolaidou	Modelling computer-mediated collaborative talk and action: a case study on ICT-based music composition in primary schools	345
N. Aliane	Control systems demonstrations using spreadsheets	349
E. Bonnick, M. Henry & G. Oliver	An assessment of an intramural preliminary course of study as a viable alternative matriculation pathway to traditional examinations into the Bachelor of Engineering programme at the University of Technology, Jamaica	353
K.A. Mastor, F.M. Hamzah, N.R. Yaacob & K. Jafar	Personality profiles of Malay and Chinese engineering students	357
A.R.N. Molson	Engineering and technological education in Greece: a missing link in cooperation between academics and professional engineers in the faculty of application-oriented engineering	361
C.J.K. Desha & K.J. Hargroves	Education for Sustainable Development Curriculum Audit (E4SD Audit): a curriculum diagnostic tool for quantifying requirements to embed sustainable development into higher education – demonstrated through a focus on engineering education	365
M.S. Sidhu	The architecture of technology-assisted problem-solving packages for engineering	373
G.G. Rogozin	Heidegger's thesis on two kinds of thinking: methods to carry out engineering education	377
F-S. Chen, T-C. Chang & Y. Chuang	Using NETPAW to advance senior high school students' English acquisition in the context of the Common European Framework	381
Index of Authors		393
